Trail Blazers

ALL over the Great West is written the record of the pioneers who blazed the first trails that guided civilization in its westward march.

As settlers followed, Montgomery Ward and George R. Thorne blazed a new trail to them, being first to fill their wants direct by mail and in the complete spirit of the Golden Rule.

Trail Blazers—Business Pioneers we were, and are. Fifty-one years have but given us experience. We stand today more alert, forward looking, searching out new methods in manufacture and trade to secure for you better goods and bigger values and greater savings.

Trail Blazers of over fifty years ago, Montgomery Ward & Co. still clings to this spirit of leadership—we are the Oldest Mail Order House and Today the Most Progressive.

This Book—
Will Save Millions of Dollars for Our Customers

THIS BOOK brings into your home an *opportunity* of such importance to you and to your family, that in your own interest I want to tell you something of the great saving it offers you.

If I could personally sit down with you there in your own home and together we could turn the pages of this book, I could tell you an interesting story about each page—of our work in manufacturing and buying in enormous quantities for cash to make possible these low prices.

I would tell you as we looked at our pages of stoves how the price of iron went from $16 up to $27 per ton, and how we bought iron for our stoves very early when it was only $18. Of how we bought leather when hides were cheap so that our own factory can today produce for you high-grade harness at very low prices.

I would tell you of the big purchase we made of rubber for tires before the price went up from 14 cents per pound to 33 cents, so that while other manufacturers had to increase their prices three times, our prices were held even below pre-war levels.

There is the same story to tell about shoes, hosiery and underwear and about woolens for men's and boys' clothing, about everything from plumbing to sporting goods, and about many hundreds of articles made of steel and cotton and wool. Our buyers visit Europe—we search the markets of the world—all a part of our work to *hold prices down* and make possible the savings this catalogue offers you.

This book brings *opportunity* to your door. But this *opportunity* is of value only if you use this book regularly and often. If you and your family will make it a habit to order from this catalogue once a month, it will mean to you a total saving of many dollars each year.

And with this saving in cash, there are two other advantages. There is the big advantage in always getting dependable goods—goods that give long wear and that will stand inspection and use. And there is the satisfaction of prompt service. Nearly all of our orders actually are shipped in less than 48 hours.

Cash savings—goods of dependable quality—prompt service, and we might also add a fourth advantage, the satisfaction of dealing with a house where your orders and letters are always appreciated—a house that is always glad to be of service to you.

The Oldest Mail Order House Is Today the Most Progressive

TO hold fast to old and tested principles, though somewhat old fashioned, is sometimes the best sort of progress.

For Fifty-One Years Montgomery Ward & Co. has followed the simple, old fashioned Golden Rule Guarantee printed above and which Mr. Ward originated when he started this business in 1872.

And with all the low prices this book offers and no matter how much lower than the market those prices may be, we never have sacrificed quality to make a low price. Low prices must always go hand in hand with Quality at Montgomery Ward & Co.

The Spirit of Progress

Following religiously the old principles of its founder, Montgomery Ward & Co. today leads in its progressiveness.

Never in our Fifty-One years experience have we had greater success in discovering new channels of trade, of manufacture, new markets to secure for you greater savings.

Never have we been so successful in bringing into your home such opportunities for real saving as this catalogue offers you.

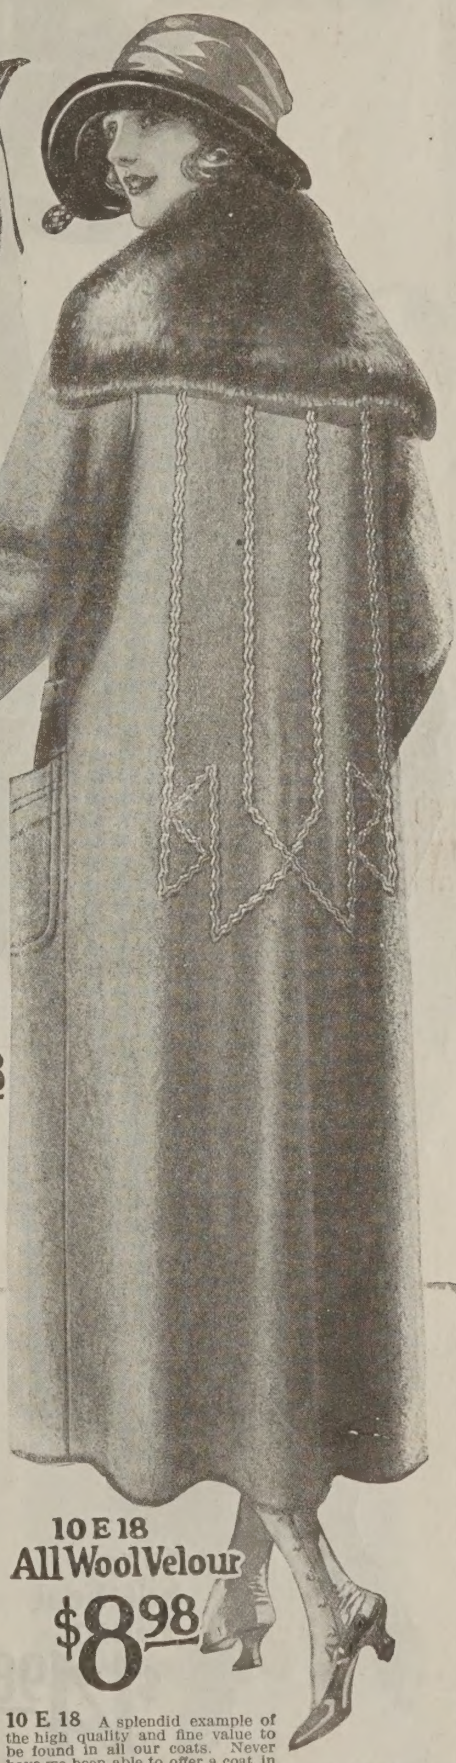
$34.98



10 E 18
All Wool Velour
$8.98

10 E 16 Dame Fashion tells the newest and loveliest of her Autumn secrets in this Coat. For material, she has used Caracul Plush, a rich, silky fabric resembling the favored Caracul Fur, combined with plain Silk Plush of the finest quality. The new word from Paris is that coats may circle slightly but the silhouette must be straight and slender. So this model uses deep, rich Manchurian Wolf to weigh down the pointed panels in a slim, elegant line. Then, there's the luxurious collar of the same fine Manchurian Wolf, also the favored fashion fur of the season. The larger the collar, the more becoming a frame for a woman's face, and this collar is even larger and lovelier than the picture shows. Full lining of lustrous Satin de Chine. Length, about 49 inches to cover your most fashionable Frocks. Tasseled braid girdle. One of the finest winter coats in our line—warm, pleasant to wear, charming—and moderately priced considering the beautiful quality of material and fur.

WOMEN'S SIZES: 34 to 46 inches bust measure.
State size wanted.

10 E 16—Black only. PRICE, **$34.98**

10 E 10 For the woman who is looking for the smartest Winter Sports Coat she can buy! She will find unusual value in quality and style in this model. Shadow Plaid Polo Coat—the material exceptionally fine. All Wool, with soft, brushy nap. The handsome plaid in harmonizing color is soft looking and refined.

Notice the deep shawl collar of Viatka Opossum Fur. Opossum, of course, is very durable; also fashionable and considered smart. But its color (Viatka) is the prettiest thing about it—brown with just the tiniest tinge of blue. It makes the fur richer against the brown of the fabric.

Sports style with the swagger inverted plait back. Good looking lining of serviceable Venetian. Buckle belt. As carefully and splendidly made as many sports coats selling at decidedly higher prices. You will save money by ordering a coat like this from Ward's. Length, about 46 inches.

WOMEN'S SIZES: 34 to 46 inches bust measure.
State size wanted.

10 E 10—Reindeer Brown.
10 E 12—Dark Brown. PRICE, **$19.98**

10 E 18 A splendid example of the high quality and fine value to be found in all our coats. Never have we been able to offer a coat in better style, finer material and such good tailoring at a price as low as $8.98. The material, a fine, smooth All Wool Velour, is as good a quality as that found in much higher priced models.

Special care has been given the tailoring. Designed over a generously full pattern—comfortably roomy in every way. The seams are all neatly bound.

The becoming loose swinging back is tastefully trimmed with heavy stitching. The handsome collar of Beaverette fur is of excellent quality and you can wear it either low or buttoned high at the neck, whichever you prefer. Unlined. Length, about 48 inches.

Back may be worn flaring if you like it that way. Length, about 45 inches. Lining of durable Twill.

The Plush is a silky, lustrous quality in that deep, true black that you should look for in plush. Very much in fashion is the shawl collar of Black Opossum, a glossy, fine, extremely becoming fur. Simple belted style, finished with pretty tassels. Pockets set in neatly so that they hardly show; at the same time, you have them to carry handkerchiefs, etc. Full length (48 inches) which will probably cover your longest dresses.

You will also find it a warm, comfortable coat. The plush is heavy in itself. It is lined to the hem with a black Venetian, one of the heaviest and nicest linings of its kind.

10 E 26 The woman who likes a Plush Coat in this length will be glad to know that short coats are again good fashion. When you wear them, as the picture shows, with a smartly plaited or plaid skirt they look very attractive and fashionable.

An unusually low price on this model—for the woman who has just so much to spend and no more. Flare back style with shawl collar. All around belt may be worn outside the back if preferred. Neatly finished welt pockets as illustrated. Full lined with Sateen. Length, about 36 in.

In selecting these coats for American women, we keep all types of customers in mind. That is why on one page we put together Plush Coats of higher and lower prices. You may want one price; one woman may want another. Our whole idea is to make it convenient for you to make your choice. Then, buying from Ward's is exactly like buying from a shop.

10 E 28 Caracul Fur itself is a curly, glossy fur now very popular and one of the winter's first fashions. This is a Silk Plush treated to give the effect of caracul. These fur fabrics are very popular and fashionable.

Made in the favorite flare back style with all around belt, which may be worn outside if preferred. Note distinctive little touches of designing — tassels finishing the sleeves; corded balls on the belt. The long shawl collar now so fashionable and favored. Length is the three-quarter style, about 40 inches long, which shows the dress. Full lined with Sateen which will appeal to the practical buyer.

We point this coat out especially to the woman who likes black plush but wants something a little different and unusual. It is warm, dressy and elegant like genuine Caracul Fur and you'll find the fabric attractive, durable and pleasant to wear.

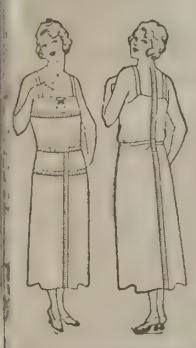
How to Measure for Women's Outer Garments



At the end of each description we tell you what measurements to send us. For some garments we require only one measurement; other garments require more than one. If you will take these measurements exactly as directed below, we guarantee to fit you satisfactorily.

Bust measure: Place the tapeline entirely around the body over fullest part of bust, close up under the arms. Do not take this measurement too tight and do not allow tape to slip down at the back.

Waist measure: Take this measurement over your corset all around the natural waist line. The number of inches shown by the tapeline is your correct waist measure.

Hip measure: Place tapeline around the fullest part of the hips over your skirt, 7 inches below your natural waist line. Do not allow tape to slip down.

Front Length of Skirt: Measure from your natural waist line in front, down to whatever length is desired.

Back Length of Dress: Measure from back of neck to bottom of hem.

The Hats shown on this page may be found on Pages 50 to 60

10 E 52 All Wool Velour Full Lined $11.98

10 E 46 The woman who knows, who keeps herself informed of the new things, can tell at a glance that this coat is of the very latest fashion. There is an air of luxury about it that suggests a much higher price.

Bolivia is the material and a more suitable one for this style could not have been found. It is soft, deep-piled and silky, and charmingly carries out the graceful, flowing lines.

Rows and rows of heavy stitching are used as trimming. Not straight across the back but curving gracefully at the sides. Little things like this make a garment more tasteful and smart.

The Beaverette collar buttons up around the throat becomingly, or may be worn gracefully open The fur is a dark, rich brown—every woman looks well in it. The welt pockets are large enough to be useful.

The side closing and long tie sash are new A pretty fashion that gives a trim slender line to the figure. The style would not be nearly as pretty if the sleeves did not flare smartly, and use the stitching effectively as a trimming.

Full length, of course, and the lining is a novelty striped, lustrous Venetian, which looks like silk, and really wears better.

"I am well pleased with my coat and hat. So are my friends. They can hardly believe I got them for what I did"

Ida M. Sherk,
Jacksonville, Fla.

10 E 56 This good looking, graceful Coat is one of our favorite models for general wear. It is dressy enough for a "best coat," too. At the side, is a set in panel, edged with a deep fur band, and stitched with heavy floss in tasteful, contrasting color. Flaring sleeves also show fur and stitching to match. A charming model to wear over soft silk dresses.

The material is a splendid quality of All Wool Velour, a soft, warm fabric that falls into graceful folds. The fur used throughout is Beaverette, soft and glossy, and especially becoming in color. Snug, deep collar that you can button up under your chin for cold days, or fold smartly back for early Spring and Fall as shown in the picture. Unlined but beautifully finished throughout.

This is a coat that will give you good wear and look well anywhere for its splendid tailoring Length, about 48 inches.

10 E 70 When you choose an all around Coat, it should have many good points, and this All Wool Polo Coat will appeal to you for that reason.

The fabric is one of the most durable materials you can find—warm, soft and attractive to look at. You will like the simple but rich trimmings—a soft, flattering Beaverette collar, stitching ending in large decorative arrow heads. To get the slender, fashionable line of the season, a narrow belt runs around the waist through slots under the arm and fastens across the outside only. This leaves the back loose and full swinging. Full lined with Twill—one of the most durable materials of its kind. A splendid example of the fine tailoring you will find in all our good coats. Length, about 48 inches.

All Wool Bolivia
$29.75

10 E 64 Have you heard about that wonderful material Bolivia? It is one of those elegant, deep piled fabrics that have come out only in the past few years, and as fine a fabric as has ever been woven. It is greatly in demand and is very beautiful. The All Wool Bolivia in this attractive coat is of excellent quality. It is skillfully tailored in every seam, even to the All Silk lining.

The style is very new—in fact, the best designers are making their finest coats in this straight, slim fashion. Cord tucking is also fashionable, especially when applied to the sleeves in this simple but effective manner. A narrow belt tied loosely adds to the graceful lines, and the unique, square buttons at the back seams are tastefully cloth covered.

To harmonize with the beautiful quality of the material, Beaverette Fur of the finest grade has been used for the collar and cuffs. Full lined with a splendid quality of silk. The coat is 48 inches long, a good length for the new dress fashions.

Of all the lovely, new deep-pile fabrics, Bolivia wears the best. It is woven close and firm. The finish is thick and deep—it would take pretty hard wear to show on it. For a material that has so much of richness and elegance, it is surprisingly durable. Another feature is the warmth of it. Pure wool, which means that it is comfortably light in weight—at the same time warm, as only pure wool can be.

10 E 74 All Wool Plaid Polo Coat Full Lined $14.75

10 E 74 This is a Coat that will give splendid service and always look smart. Cut on dashing, boyish lines, it is wonderfully becoming and comfortable. It is designed for general wear and has those good points of style you would expect in a more expensive top coat. Of course, there is nothing quite so fashionable for this kind of coat as plaid material, and this one is up to the minute without being gaudy.

The convertible collar can be worn rolled back on the shoulders, or buttoned across under your chin for cold days. See small picture above at right. The raglan sleeves are roomy and wide—loose enough for comfort over a dress or suit. We have used a soft Plaid Coating for this model, and its cosy warmth will be a delight to you all through the winter. It wears wonderfully well and will stand all sorts of weather.

The lining of striped Venetian runs clear to the hem where it is left loose—as all better top coats are lined. The pockets are deep and snug, and in just the right place for you to slip your hands in on a cold day. This coat represents good, honest value and excellent workmanship. Length, about 48 inches.

WE have said much about the value in these Coats. They're so excellent for the money. You're buying unusually good material when you order from us, and a high quality of workmanship. This is true economy. A well made coat, of good material, wears better—wears a long time. It means money wisely spent.

10 E 80 Silk Seal Plush $16.98

10 E 80 If you like the appearance and softness of seal without its heavy weight, you will be pleased with this Coat. It is made of excellent quality Silk Seal Plush and suggests the luster and richness of real seal. This is a luxurious coat, and you can wear it for street and dressy occasions.

We have chosen a style that is being used by some of the best furriers in New York. Loose and roomy and the length that is becoming to most figures. A large collar and cuffs of soft Gray Russian Goat Fur give the right contrast to the rich black of the plush. You can slip your hands into the deep pockets or tuck them into the cuffs, Chinese fashion, and you'll be snug and warm. A cord girdle, tied loosely, completes the charming picture for a cold day. The lining is of Twill, a durable soft fabric, extending to the hem. This is an exceptional value both in material and tailoring. It will be a comfortable coat for your entire winter or longer. Length, about 40 inches.

10 E 82 When you have looked around at other Coats, you will realize that this is an unusually good value. It embraces so many good points in style and material. The demand this season is for straight coats with a slight flare, so we have selected this model with that in view.

The narrow belt fastens across the front leaving the back loose. Stitching and pin tucks are used down the back to carry out the slim effect so desirable. For general wear, you will find no more durable or comfortable coat. The sleeves are cut wide and set in deep armholes so you can wear it over a heavy dress or suit for colder weather. A collar of Beaverette finishes this becoming style and can be buttoned high for blustery weather or worn open. Velour—a soft All Wool material that stands hard wear and is warm enough for winter—is the fabric we have chosen and it is lined to the hem with a good quality Twill. Length, about 48 inches.

The style is the straight, slender fashion of the winter—so trim and smart that most women find it surprisingly becoming. Fiber Silk Braid trimming as illustrated. Fancy buttons and side tie sash. Description of Coats Pictured on Opposite Page

10 E 168 The kind of a Coat that can be depended upon to give you service day in and day out. And for the woman who has only a certain amount to spend for her winter Coat, isn't this an important point?

The All Wool Velour is heavy enough so that the coat does not need a lining. Every seam is therefore neatly bound. The simple, tailored style is smartly topped by a large collar of brown Coney Fur.

You will like the way heavy stitching has been used to trim the back. The all around belt, deep cuff effect, and patch pockets are button trimmed.

Again, with this coat, we can talk value, and tell you that it would be hard to find a coat as good looking, for the price, anywhere. Length, about 50 inches.

10 E 172 The clever use of wool embroidery and braid is a new idea in winter fashions. One often grows tired of the plainer styles. Notice how effectively this embroidery has been used at the sides of this model. The skillfully fashioned sleeves and the large collar would, of course, be quite incomplete without their share of this pretty embroidery also.

We have put a splendid All Wool material into this Polo Coat, and lined it with a lustrous Venetian that adds extra warmth and service. The heavy fiber silk cord girdle, with its large tassels and tiny metal clasps, will be appreciated by the woman who likes nice things.

Inasmuch as this coat is of the Ward standard throughout, you'll find the value very good. Length, about 48 inches.

10 E 176 The popularity of the shorter coat has returned again this year. It is a great favorite with the woman who likes to be well dressed upon all occasions, and is there any woman who doesn't?

Not only is the short coat smart, but doubly so when, as in this model, it is fashioned of a rich black Silk Seal Plush, suggesting fur. Dark Brown Coney Fur is so becoming that we've chosen it for the large shawl collar. This graceful length requires that the belt be worn all around, well down over the hips. Both the belt and the deep simulated cuffs are button trimmed. The charming colors of the fancy Sateen lining form a lovely contrast with the black of the plush. When worn with a pretty skirt or dress, this coat makes a costume very reasonably priced, yet truly smart. Length, about 36 inches.

10 E 178 From the style centers of the country comes the fine news that much embroidery trims the new winter Coats. When we look at this really stunning model, we can realize how much the generous use of it adds to the effect of smartness.

The full kimono sleeves are also a new note, which you will welcome because of the flowing sleeves on most dresses. The All Wool Suede Velour is very soft and fine. Only lining of rich Venetian from neck to hem would do. Nothing has been left undone to complete the appeal of this beautiful coat. The Beaverette collar is unusually large, and even the buttons show perfect taste in their rich colors. Length, about 48 inches.

10 E 184 A Coat isn't really a bargain unless the low price brings with it quality, serviceability and style. Because this coat has all these things, combined with a price that is remarkably low, we consider it an exceptional value.

The material is a soft, warm, All Wool Coating well tailored, with every seam bound and finished. The way the buttons have been used on the sleeves is new. The large convertible collar of Coney Fur adds warmth as well as smartness. Most interesting is the way in which the heavy stitching has been used to trim the back. Unlined.

If you select this coat you'll hardly associate it with the very small sum that brought it to you. Length, about 48 inches.

10 E 190 A Coat that so harmonizes with soft brown Beaverette Fur, that it is even used to trim the pockets. And quite a distinctive touch this is, too. You would hardly believe the price could be so low, because the large collar is also of the fur. Doesn't the very effective stitching on the back give the coat a stylish air?

The material is fashionable Velour, All Wool, of course. Most winter coats from Ward's are. It is 48 inches long, and lined with firmly woven Twill. Deep raglan sleeves flare gracefully and have a button trimmed turn-back cuff. You tie the belt, and let the long ends hang loosely for smartness.

10 E 194—Black. **Postage, 16¢ extra**

10 E 196 To the woman whose first thought for her new coat is that it be practical, we suggest this very tasteful model. If she is looking for economy as well, then she need seek no further. The style is simple, yet smart, and if you have your own furs, they will look ever so well on this coat.

The material is All Wool Velour, heavy enough to be warm without lining. Needless to tell you that you won't find an unfinished seam in the whole garment. Stitching is the trimming, but used in a way that is altogether new, forming narrow panels in the back, which are trimmed with buttons. The large convertible collar is relieved from severity by more of the stitching. Could you want anything nicer at this low price? Length, about 48 inches.

10 E 200 A truly fine value. If you have looked at Winter Coats elsewhere you will be surprised at the fine quality and workmanship of this heavy winter model.

The coat is of All Wool Velour—an exceptional quality, smooth and heavy, and most desirable because of its splendid appearance and wearing qualities. It is 48 inches long and half lined with high-luster, serviceable Twill.

The style is rich and tasteful. Braid covers the slightly flaring side panels and trims the sleeves. The square collar is of soft, fine Beaverette Fur. All details of cutting and finishing have been done with the careful attention we especially give our tailored garments.

Every effort has been made to offer in this model a genuinely remarkable value. You will be delighted with the result.

10 E 206 Only a specially favorable purchase enables us to offer this unusually fine model at so low a price. The Bolivia is of a quality usually seen only in more expensive wraps—a soft-ribbed weave with an exceptionally silky luster.

We believe every woman knows how desirable and lovely Bolivia is. A few years ago it was new—it didn't take long before women everywhere were asking for coats of it. It looks rich and elegant, because it is deep piled and velvety, and takes color with unusual richness. At the same time, it is reasonably durable.

The coat has been made in a style that is both conservative and very smart. A straight loose back, belted front, cuffed sleeves and large collar of Beaverette Fur. It is 48 inches long.

Lines of stitching and tailor's darts relieve the severity of the back and buttons trim the sleeves. The fur collar is of excellent quality. Full lined with striped Venetian.

Every detail is splendid. The cut, the tailoring, the finishing are like you would expect to find only in much more expensive garments. The value is truly extraordinary.

10 E 212 We worked unusually hard to prepare for you this model of fine All Wool Suede Velour with its big collar and deep cuffs of thick Beaverette.

The heavy, soft material with the smooth finish of suede has been made into the warmest of winter coats, full 48 inches long, and lined with good looking, serviceable Venetian.

Most becoming in its style is the long shawl collar of Beaverette. The deep cuffs, too, exhibit the fine quality of the fur to fine advantage.

Wide bands of stitching form an interesting and attractive trimming for the back of the coat. The front is plain except for huge patch pockets trimmed with buttons. Raglan sleeves and an all around belt are other desirable features.

The tailoring is the best that can be obtained at the price. All Montgomery Ward & Co. coats are notable for their splendid tailoring and finishing and this coat is an excellent example of careful attention to workmanship. Whatever else you have seen you will be impressed with the splendid value offered in this model.

11 E 608 Muskrat is one of the most durable furs you can buy. Wear it on the stormiest day in Winter—the next day it will be as pretty and glossy as new. For a woman who wants a coat to be both practical and beautiful, there is no better choice.

The model above is of fine quality—skins handsomely marked and matched; the reversed effect on the bottom and the cuffs make a striking trimming. Collar gathered in the new way to make it stand out prettily as a frame for the face. Our price on this coat makes it a splendid value. Ask any fur expert if $99.98 isn't an exceptionally low price for a good Muskrat coat. Notice we emphasize "good"—excellent skins; smart styling; lining of Skinner's Brocaded Satin guaranteed to wear two years. We have seen hundreds of Fur Coats in fine city stores, and never have we seen a better value.

11 E 600 If you admire Hudson Seal, this model should be your choice. The fur is Hudson Bay Seal—French Coney sheared and dyed, but done so thoroughly and well, it would almost take an expert to tell the difference. Glossy, velvety, the skins finely matched—it has the appearance of a very much more expensive coat.

The style is charming. A softly shirred, becoming collar and graceful flowing sleeves with windshields at your wrists to keep the cold out. Braided silk sash with heavy black tassel. Special canvas interlining to prevent skins from ripping. In handsome contrast, a lining of Crinkled Crepe that will show prettily when you take off your coat.

11 E 604 Here is a Fur Coat so wonderfully low in price, it would seem that hundreds of women could afford its comfort. It is hardly more than many women pay for a cloth coat, and you have the complete comfort that only fur can give.

We can make the low price because we bought the skins early last Spring and had them made up specially. In this way, we can give you a much better quality than you would expect at the price. Rich, dark brown imported Coney is the fur. Fine haired and glossy. The style is the shawl collared, flare sleeved model that most women find comfortable to wear, and becoming. Tasseled cord sash, also new and smart. Attractive All Silk lining in fancy design. A well made coat with thoughtful details like wind protector cuffs for the sleeves, handy pockets and backs of skins "stayed" to prevent splitting.

11 E 616 Montgomery Ward and Co. could sell furs at lower prices but we don't believe it is a good thing for people to buy them. What we offer represents our judgment of the lowest possible price for which you can get dependable, good looking furs.

Consider this model of Mink Marmot. It could be an inferior quality; yet we could picture it just as charmingly as above. But when you order our Coat, you know beforehand you are going to get a garment of quality because we never sell anything else. The strippings are Marmot skins cut with infinite care into stripes and sewed together to look like genuine Mink. Because of the striped effect, the reversed border is unusually attractive. Fancy silk braid girdle. Shawl collar that may be buttoned high for Winter days. Handsome lining of Skinner's Brocaded Satin in a lovely bright color that shows when you take off your coat. This is one of our finest coats, designed for the woman of fastidious taste.

Wear Lambskin or Chamois Leather Lined Coats

MORE women and girls who like to be outside in Winter should have them. As it is, hundreds write us how wonderfully comfortable and satisfactory they are, and how thankful they are to us for including them in our Catalogue.

Another point about them that women appreciate is the style we've put into them. Not just great, heavy Jack Frost coats that you wear with an apology for keeping warm.

They're good looking, smart sports coats, and you could really substitute one for a dressy coat, if you live in a climate where the winters are very cold.

We have used excellent woolen materials for them. The heavy linings are put in by expert tailors—neatly and smoothly, so they hardly show on the outside. No bulkiness—no discomfort. The quality straight through is very unusual for the money because we bought the materials and furs many months ago when prices were lower than they are likely to be for some time to come.

10 E 400 Most women are now paying more for their Coats than they would have thought of doing a few years ago. And this is the reason: some new and very beautiful fabrics have come out in the past few years. Fabrics as soft and lovely to look at and feel as Velvet. Fabrics that make coats more graceful and wearable than ever before.

This model of All Wool Bolivia is one of these new coats, and Bolivia is one of the new materials. It is quite impossible to fully describe it to you except that it is lovely and rich and fine. There is no doubt at all that you will be delighted with it, that you will be satisfied your money has been well spent. It is just the kind of model you yourself would choose if you came to a good shop with the idea of buying a fine coat.

Stout women will especially like the style. It has the longer lines that tend to slenderize the figure. Notice especially the shawl collar and the long line of the braiding at the back.

A truly lovely style from one of our best makers who specializes in extra sizes. Made plain, as it should be, to show off the beauty of the material. Good lines that give you a trim slenderized figure. Careful, high-class tailoring—all that would go with such a handsome material!

The embroidery is beautifully done—with silk floss in the tasteful, refined design shown in the smaller figure. The cuffs have a motif to match. Large luxurious collar of Black Opossum. Lined to the hem with a fine quality of Striped Venetian. A truly fine coat for the woman who has a taste for the best! Length, about 50 inches.

Be Ready for Rainy Weather

There is no doubt about it—a Raincoat should be included in every woman's and child's wardrobe. It's health protection and economy.

Now you can realize a particular saving because we are offering you better quality than you would ordinarily get at the same price.

We can do this for one very good reason—you can imagine the many thousand coats we buy in one single order. Manufacturers and mill owners are therefore glad to get our business, and often make us special price concessions. We search markets the country over to find what we want—the best style, the best quality, the best making for the price. When we announce special values, as in the case of these raincoats, it means that we are passing on to you the benefit of the bargains we are able to secure for you.

10 E 500 Wherever fashionable women gather, wherever the new things are seen, you will find Coats like this model. But you don't often associate them with a price so moderate.

You really could not help but like the very clever way in which groups of tucks have been used. They add such a distinctive touch. We were also careful to find just the right girdle—two heavy cords, fastened together with artistic metal clasps.

Of course, a coat of such an unusual quality should have a collar of Fur—soft, brown Beaverette, which can be worn open or closed, as the weather demands. The material is an All Wool Suede Velour, and the coat is full lined with lustrous Venetian. The raglan sleeves, and pointed button trimmed cuffs tell their own story of smartness. 10 E 506 Far above the ordinary run of Plush Coats is this model. Its smart style will make it a favorite with the miss who knows that she always looks well in rich black. The material is Silk Seal Plush—at the first glance it gives the luxurious effect of fur. You will get a great amount of comfort and pleasure in wearing this model. The value is extraordinary.

A graceful, wrappy line has been secured by giving this coat kimono sleeves—deep, full cut sleeves to which buttons and deep cuffs of Coney Fur add much. The collar, too, is of Coney—it can be rolled high, in choker effect, and held in place by snaps.

Two other very interesting style notes are the heavy cord girdle, and the large flaps in the pockets. For a lining, we have used fancy Sateen, printed in the prettiest colors imaginable, to contrast with the blackness of the plush. Length, about 46 inches.

10 E 508 If you have asked yourself, "Where can I find a Winter Coat that combines good looks and serviceability with a very low price," you have the answer right here.

We have used a heavy All Wool Coating, and have chosen a style that looks smart because of its simplicity and good taste. The panel, which the picture shows, is stitched with twist. Buttons trim the back. The front is smartly plain, but the two patch pockets are button trimmed. The large convertible collar closes at the side in a way which is quite unusual. (See small sketch.) The belt fastens at the front with a buckle and eyelets, and may be worn all around. The raglan sleeves and simulated cuffs are in accord with the swagger style. Unlined, but material is heavy enough so that, with a sweater, it will do for winter. Length, about 46 inches.

10 E 514 Paris says, to be one step ahead of the fashion, your Coat must be plaid. Frankly, we have seldom, if ever, seen a plaid coat more stunning than this All Wool Polo model.

There is a certain air, a swagger smartness in it which is indeed unusual. The wide raglan sleeves with their very deep cuffs, the loose flaring back, and large patch pockets, all contribute to this smart effect.

The belt is worn low and loose, on the outside, and a large buckle of unusual beauty trims the front of it. The collar may be worn open or closed with equal smartness. We've used an excellent quality striped Venetian as a lining. The coat is 46 inches long.

All Wool Bolivia
$28.98

10 E 518 A splendid Coat of the latest style and the very best materials. Made of soft, thick All-Wool Bolivia, about 46 inches long, the fine quality of the whole garment carried out in the details of trimming and in the wide collar of heavy Manchurian Wolf. Because of its warmth it is suitable for cold weather and because of its style it may be worn on any occasion.

Fashionably straight slim lines are aided by a wide band of braiding around the bottom of the coat and above the cuffs. The coat is unbelted since the long ties of material fasten it on one side leaving the front and back lines unbroken.

The collar is large, of heavy fur and may be buttoned snugly under the chin. The fur is of splendid quality.

Striped Venetian has been used for the lining which is carefully tailored and shows the same workmanship as all details of finishing and trimming.

The All-Wool Bolivia of which the coat is made is of a fine quality and has the silky sheen for which this fabric is noted. Bolivia is especially good in the colors in which this model is offered.

Kit Fox Gray—a beautiful shade of dark gray—is one of the fashionable colors for this winter both in New York and in Paris. It is strikingly attractive with the collar of black fur.

Navy Blue is especially good looking in Bolivia and the shade of Dark Brown offered, a rich, warm tone, is perhaps the favorite for Fall.

Fine quality and new style make this coat a remarkable value at this price.

10 E 548 For good, practical wear this is one of our best models. It is one of those comfortable Coats that you can slip into and feel that you look well anywhere. And it has so many good style points found in higher priced Coats—the one-button side closing, the wide sleeves, the popular flare back caught with a belt. You will notice how the wide collar folds down to give the long waisted effect, or can be fastened under the chin. The wide raglan sleeves are becoming and comfortable over a dress. A narrow sash ties softly around the waist, quite low.

All Wool Coating is the popular fabric we have used. It is soft and warm with a deep nap. The firm, Twill lining reaches to the hem and every detail of finishing is up to our standard. Length, about 42 inches.

For this practical Coat we have used All Wool Velour and made the collar of genuine Brown Coney Fur. It is unlined but carefully finished in every detail and warm enough for ordinary weather.

Rows of up and down stitching in the back with decorative buttons between, give a long line effect. And the plain length is relieved by the very narrow belt that buttons across the front. You will like the cleverly cut collar. It rolls back becomingly when unfastened but can be buttoned snugly under your chin on cold days. 10 E 544 A good quality of All Wool Velour makes this a very smart and serviceable Coat for every sort of wear. If you could slip it on you would see how pretty and becoming this style is. The model is one that most women find becoming. This is a season when embroidery is used on many expensive Coats, so we have used a beautiful design for the trimming across the back, on the cuffs and collar.

The wide convertible collar rolls back to give the new cape effect and is embroidered all around. It may be fastened up in an unusual way across the front, making this a warm Coat in cold weather. The wide sleeves are set in deep armholes and are finished with a pointed cuff. A narrow belt runs around the waist, through slits under the arms and fastens outside across the front only. This leaves the back loose and full.

Although this Coat is unlined it is beautifully finished in every seam. The pockets are deeper than in ordinary Coats and you will find the buttons good quality. A good value for such a low price. Length, about 46 inches

And just because the material is so beautiful, we have purposely made it plain and tailored. Rows of lustrous stitching, used in a novel way, is the only trimming needed.
The large collar can be worn open, or buttoned snugly at the throat. And speaking of buttons, we have selected unusually pretty ones for this coat. The fashionable side closing is another point of interest, and the long sash belt is both useful and smart. The length is from 43 to 45 inches, and the full lining is a lustrous Venetian, in a matching shade.
This is the sort of a coat the very exclusive shops in the large cities like to show.

The back has two box plaits placed close together and trimmed with buttons. The patch pockets boast large pointed flaps and these, with their big buttons, are conspicuously smart. A deep fringe edges the wide belt which may be worn in the front only, or all arcund, just as you wish.
One reason why girls like collars of Beaverette is its softness and becoming color. At least, you will find this true of the collar we have put on this coat. We use only good quality Beaverette, soft, silky and much like Beaver itself. Length, 43 to 45 inches.

Deep set raglan sleeves flaring at the bottom, with turn back cuffs tell a fashion story of their own. The quality of the Beaverette collar is quite worth while mentioning in a coat at this price. It may be worn open or closed. The belt is drawn through slits at the sides, or you may wear it all around.
Girls of flapper age are particular about styles. We know this so we provide the newest, smartest flapper fashions of the city. But to back up our fashions we are particular about the quality of our materials and the nicety of our tailoring. Length, 43 to 45 in.

Frocks in The New Fashions

IT is a long time since women's fashions have been more lovely. A season of color has come—colors you haven't worn in a long time, and colors that all women welcome because they are new, different and charming.

A soft, lovely new green in dresses. Browns that will match the loveliest of Autumn leaves. Always charming gray, a favorite for both coats and dresses. Paris says that navy blue is good, especially when touches of red go with it.

According to fashion, Montgomery Ward and Co. frocks for Misses and Women are right. You may choose here the new colors—and all the other style points as well. The colorful Oriental prints. The handsome embroideries. The drapings and plaits and flounces that women of best taste are wearing.

Then, when you write your order, you have the assurance that your dress will be finely made and of the splendid quality material and workmanship that you always associate with Montgomery Ward and Co. apparel.

14 E 12
All Silk
Canton Crepe
$19.98

14 E 12 The most fashionable materials are the flat crepes. They drape and fold gracefully, and give the slender, straight silhouette even if panels or folds are used.

In this Frock, the All Silk Canton Crepe is a fine, lovely quality greatly resembling the popular flat crepe. The idea is that you get a frock that looks almost as fashionable for very much less money.

And what is there in a silk so practical and charming as Canton crepe? It wears a long time, and looks equally well in summer and winter. A Dress of it may be worn for practically any occasion, because it makes up in such fine taste.

A graceful, charming style. The beading is done by hand, and is very distinctive because tiny beads are used, closely sewed together. Very much in the manner of lovely French dresses imported from Paris. Long panels give the fashionable, long, slender line; the softly crushed girdle is gracefully low. A dress of a quality you'd find only in higher-priced shops. We offer it here at a distinct value.

14 E 18 From Paris, where all the best ideas for pretty frocks start, came the inspiration for this Dress of Spanish Lace. It is the charming, dressy kind of frock you will wear to evening parties and dances. At the same time, it is simple enough for Sunday afternoons. The lace has a dainty, open work pattern in scroll design, and is simply made to show the beauty of the lace. Straightline with softly crushed girdle—still the favored silhouette of fashion. Finishing the flowing, cape effect sleeves is a fancy metallic ribbon braid in contrasting color.

Under this Frock, you will really need a slip—the best fashion is to match it in the color of the lace. We can supply you with exactly the model you need, in any of the lingerie materials. Princess Slips, illustrated and described on Pages 76, 77, 109 and 114.

14 E 22
All Wool Poiret Twill
$13.95

14 E 22 The Coat Frock is one of the popular new styles. You will not choose anything better from the point of view of fashion. The reason is plain: You will wear it early in the fall without a coat or wrap, and it will look trim and stylish. For winter, it has the straight, tailored lines that go so well with heavier coats. Fine All Wool Poiret Twill is the fabric, and this is what all the best dressed women are wearing when it comes to woolen frocks. Trimmed with rows of fancy cire braid, metallic buckles, a side-tie of lustrous black moire ribbon—three more points that are new, popular fashions.

This frock illustrates a thing we are aiming to do. New York is the admitted fashion center of the United States. If ever a lovely frock can be bought, New York is the place to buy it. In our Fashion Section, we bring you the pictures of these fashions—the favorite things New York women are wearing.

You can absolutely depend on us for the material and the making. Take it for granted right away that it will be the best your money can buy. We insist to our manufacturers that the quality of fabric must be really good, and every garment that goes out to you is carefully inspected for well-finished seams, right fit, and generally correct tailoring.

14 E 162 You will find this slip-on Frock a becoming style. The wide cape sleeves, simple neckline and straight basque waist are very smart this season. Some very high priced frocks have these wide cape-effect sleeves, and most of all, they are richly embroidered like this model.

Navy or black Taffeta of good firm quality is used and the embroidery, which is the only trimming, is done in soft contrasting colors. It is really a very flattering style and one that you will feel comfortable in wearing anywhere. The sash is of narrow Ribbon the color of the dress and is tied in a bow with long streamer ends hanging. This is an unusually good value and carefully made, like all of our frocks.

14 E 166 Silk and Wool Crepe is used for this delightful little Frock with its unusual bead trimming. It is the sort of dress you will be proud to wear for "dress up."

Copied from an exclusive model it was made especially for our catalogue. Wide butterfly sleeves will give you the soft graceful effect over the shoulders so becoming and so slenderizing. The simple neckline is made so you can slip it over your head without the bother of fastenings. A soft loosely draped girdle carries out the popular low waistline. The striking design is richly embroidered in beads of soft gleaming color. In short, this is a very pretty costume, and an unusually good value.

Just the Right Fit

"I received the dress all right and was much pleased with it. Just the right fit."

Anna Froskett,
Worcester, Mass.

Printed with Miss Froskett's Permission

14 E 170 There is a great deal of charm in this demure little Frock of good quality Satin. By its very simplicity and richness of material it will appeal to you as an unusual value.

The waist is straight and plain—a very becoming style—and has a plain neckline piped with the material. The fine plaited panels are made of the material, picot edged, and finished at the top with a deep ruching. A richly beaded and jeweled band crosses the front of the waistline, adding a fascinating touch of color. The sleeves are wide, set in rather deep armholes with cording, and finished with a plaited picot edge frill. A narrow sash of the Satin ties softly at the back. This fabric is a rich soft quality and has been used by New York designers for very expensive dresses. Of course, we are able to offer this frock much cheaper because we order in large quantities. You may have either navy blue, brown or black, all the popular Fall colors.

PRICE, **Postage, 10¢ extra** **$17.98**

14 E 176 Poiret Twill of fine quality is the fabric we have chosen for this Frock. It is just the style of dress you would pay a great deal more for in most city shops. In fact, large stores are using this smart material in dresses that would cost you perhaps twice as much.

This is made, like more expensive dresses, in a very simple slip-over style. There is no trimming except the unusual panel inset on the front of the skirt, which is beautifully hand embroidered in heavy silk. The collar repeats this embroidery and the sleeves are rather wide and three-quarter length. The piping is Silk Crepe which edges the skirt panel and matches the deep facing in the sleeves. The straight slim effect is carried out by a narrow sash belt of the material which ties very loosely at the side, as shown in the sketch.

We consider this one of our smartest styles and an excellent value.

We have beaded it beautifully in bright beads across the bottom of the waist front. The sleeves are a new style, wide with bell shaped, slashed cuffs. These are piped with the silk to match the plain round neck. The very narrow sash belt should be tied loosely in a bow at the side back. If you have looked about for a dress of this type you will realize that we are offering you in this model an exceptional value in style and material.

14 E 178 You will find this good looking All Wool Serge Frock very comfortable and practical for general wear. There is a great deal of style in its attractive simplicity.

The trimming, as you will notice, has a decidedly military touch. Braiding is very smart now, and this dress is trimmed with just the right amount. The rows stitched below the sash belt accent the long line of the figure; the rows down the front and around the wide sleeves are relieved by a touch of bright color worked into the center plait and on the edge of the sleeves. The round neck also has a touch of this gay color in a narrow piping.

14 E 200 The very simplicity of this hand-drawn Frock of Wool Mixed Canton Crepe proves its smartness. Designed on youthful lines, it is a style that is very popular in New York.

The side closing gives a stylish effect further brought out by the straight lines of the skirt. Both the neck and cuffs are piped with Satin to match the buttons at the side. A clever design in hand-drawn work trims the side front and is hand embroidered in the color to match pipings. Two little tailored pockets are set crosswise at one side—one above the narrow belt and the other below.

14 E 184 All Silk Crepe de Chine is the material in this little Frock. It is designed for slight or full figures and is equally becoming to both. The shaped girdle gives a smart length of line, enhanced by the flcatin panels. These are cut handkerchief shape and shirred to the waist. An elaborate design of braiding is carried out in two tones to harmonize with the material. This extends around the neckline, down the front of the waist and about the girdle. The wide, open sleeves are piped with the material and richly trimmed with this braiding also. A square neck gives a youthful touch and is piped with the silk and ties with tiny bias cording in a dainty bow.

We have put thought and care into the making of this dress and know you would find it becoming and suitable for any occasion. It has a rich simplicity and feminine grace that is entirely delightful. We feel that this is really an excellent value.

14 E 190 This Frock is designed along the lines of the most popular frocks seen in New York this season—the useful "coat dress."

The sleeves are the new shape, left open to the short tight sleeve and faced with bright contrasting material to tone in with the embroidery. Down the front, clear to the hemline, extends this delightful embroidery in gay contrasting colors. A touch also finds its way to the collar, pockets and sleeves. A softly rolling collar gives a youthful effect that is quite flattering. The material is a fine quality of All-Wool French Serge and the embroidery is carried out in delightful colors.

14 E 180 Checks are popular this season and are again worn by the smartest dressed women. For this Frock we have chosen a soft woven Check Velour. And, of course, we made it into a stylish straight line model.

The roll collar and side closing are points that are found in many very high priced dresses. The sleeves are close and long with a novel loose bias band trimming down the cuff. This bias effect is carried out in the clever pocket fold, the side front and the narrow belt. That and smoked pearl buttons, novelty buckle belt, are the only decorations needed.

14 E 472 Accustomed as we are to seeing smart little dresses moderately priced, we are more than usually enthusiastic about the price of this All Wool Serge Dress. It has so many points to recommend it, we know you, too, will consider it a splendid value.

It is well made of All Wool French Serge, that excellent, firm quality that wears so well. Straight plaited skirt—and notice that there isn't a bit of skimping in the fullness. This makes for that graceful, straight line that is so necessary in a plaited skirt.

The sleeves are different and certainly charming—full plaited cuffs that ripple from a close-fitting top. Quite in the manner of late Paris reports.

Another fashion feature is the embroidery in bright colors, finishing the modish side opening and forming an attractive plaque at the front. Sash of self material, tassel edged.

IT has been the policy of Montgomery Ward and Co. for more than fifty years that garments must be described and pictured exactly as they are. This is assurance that the dress you receive will be exactly like the model you had in mind when you ordered.

14 E 458 If you could walk along Fifth Avenue, the style center of fashionable New York, you would see the smartest women wearing frocks like this. In fact, to be really well dressed, you should have at least one of them.

Not only is it most fashionable—it is practical as well, for it consists of a blouse which can be worn separately with other skirts' and a skirt which will look equally well with other blouses.

The skirt is a full plaited model, of Canton Crepe, attached to a matching camisole, the top of which has a wide hemstitched hem. For the blouse we have used Crepe Knit, a silk knitted material, with a surface like ratine. The front of the blouse is faced with the plain color Canton Crepe, and a long sash fastens it at the side.

We feel particularly fortunate in being able to offer this stunning model at this price, but only in seeing it for yourself can you fully realize its beauty.

It is made of All Wool Velour of good quality—smoothly finished, warm and good looking. As Velour wears so well and is so practical the dress is serviceable as well as very pretty.

The lines of the Dress are the simplest possible—straight and slim and very comfortable. It is cut kimono fashion with three-quarter length sleeves set on below the shoulder. A belt of the material outlines a low waistline.

As if to make up for the simplicity of its style, the trimming is very gay indeed. The fashionable appearance of the embroidery is carried out, too, in the V shaped vest which is of Persian patterned Silk Mull Tussah.

Young women will find this an admirable frock for school, business or even for afternoon wear. It is warm and durable and pretty.

14 E 350 Everything about this Dress tends to slenderize the stout figure: the long, loose plaits at each side; the narrow belt of the material; the becomingly shaped collar.

The material is an All Wool Crepe, purposely selected because it tailors so well and holds its shape so nicely. The woman who knows how to sew will like the way every seam is bound, and how well the dress is finished.

The entire length of the front is beautifully hand embroidered in a neat design of closely-set French knots. The embroidery is repeated on the sleeves. Flat tailored braid neatly outlines the neck and sleeves.

A dress that will give good service, and always look well. You'll find it very moderately priced and a value decidedly worth while.

LARGE women say it is hard to find extra size dresses in the pretty, new fashions. And they point out they are tired of the plain "conservative" styles that large women usually are offered. In these models, we have adapted the newer, smarter fashions to give style to the full figure, as well as the desirable slender effect.

14 E 354 The larger woman has a very special dress problem. She must wear plain, slenderizing lines. The more simple the style for the large woman, the more becoming she will find it. This dress of lustrous Silk and Cotton poplin proves this fact.

A slender effect is brought about by the clever way in which pleated panels are used on each side of the skirt. The waist is very effectively hand embroidered, but just enough is used to add to the style, without taking away from the simple lines. The flaring sleeve is favored by the large woman. We ourselves consider this an excellent value, and believe you will also.

10 E 1116 This suit was carefully planned for the woman who is short-waisted, and whose hips are rather large. It will give fashionable straight lines to this type of figure, because experts have designed it to do just this. The jacket is cleverly fitted, the way your own tailor would make it, if he were making the suit to your individual order. The material is an All Wool Poiret Twill, there is nothing better for a fall suit. An effective all over embroidery design of black braid has been used on the back and pockets. Coat is about 32 inches long, lined with messaline; also interlined. Two-piece skirt with neat welt pockets. The graceful lines of the long roll collar also add to the slender effect.

10 E 1120 The latest fashion news from Paris gives us the interesting information that suits are to be worn this year, for fall and winter, more than ever before. Really well dressed women always show a preference for suits. They are so smart, and permit a charming variety when one has several pretty blouses. You will certainly like this model of All Wool Velour, of a splendid soft quality. The embroidery is quite unusual, with its narrow bands of the Velour stitched in place with big, effective stitches of floss. The fashionable side closing is here, held in place with a graceful tie belt, which you may wear as tight or as loose as you wish. The jacket is 32 inches long, and is lined with a lustrous Satin de Chine. A large collar of soft brown Beaverette Fur adds both style and warmth. The jacket has been warmly interlined, so that you can wear this suit all winter.

These seams have also been used to advantage on the two-piece skirt with its neat welt pockets. The woman who likes a bit of variety in her tailored suit, will appreciate the cleverly cut, long rolling collar. We've used a fine All Wool Serge in this suit, the kind of material that you would usually associate with garments costing a good deal more. 10 E 1126 If you are of normal proportions with normal shoulders and waistline, and arms of average length, this is Your suit. It will look exceedingly well on you, and the slightly longer coat will be vastly becoming. We consider this one of the very best of the new season's suit models, and an exceptional value at this price. The men who made this suit found that the All Wool Serge tailored unusually well. They very carefully stitched four rows of braid down each side of the back, and used this same braid to trim the pockets smartly. The coat is lined with fancy Sateen and interlined for extra warmth. Deep openings on each side give the needed fullness over the hips, confined by a narrow belt. The two-piece skirt has neat welt pockets, and a separate belt. Length of jacket, about 34 inches.

The material is an All Wool Poiret Twill, and the gracefully styled, 34-inch coat is lined with Satin de Chine.

Who but a very clever designer would think of combining black braid in two distinct widths and using it as a trimming on the sides of the coat and on the pockets. In the sketch, notice how pretty this trimming is, and now the many buttons add a touch of smartness.

The tailoring is faultless. You can count on this suit holding its shape, and looking trig and neat for an indefinite time. The two-piece skirt has two useful welt pockets, and a separate belt.

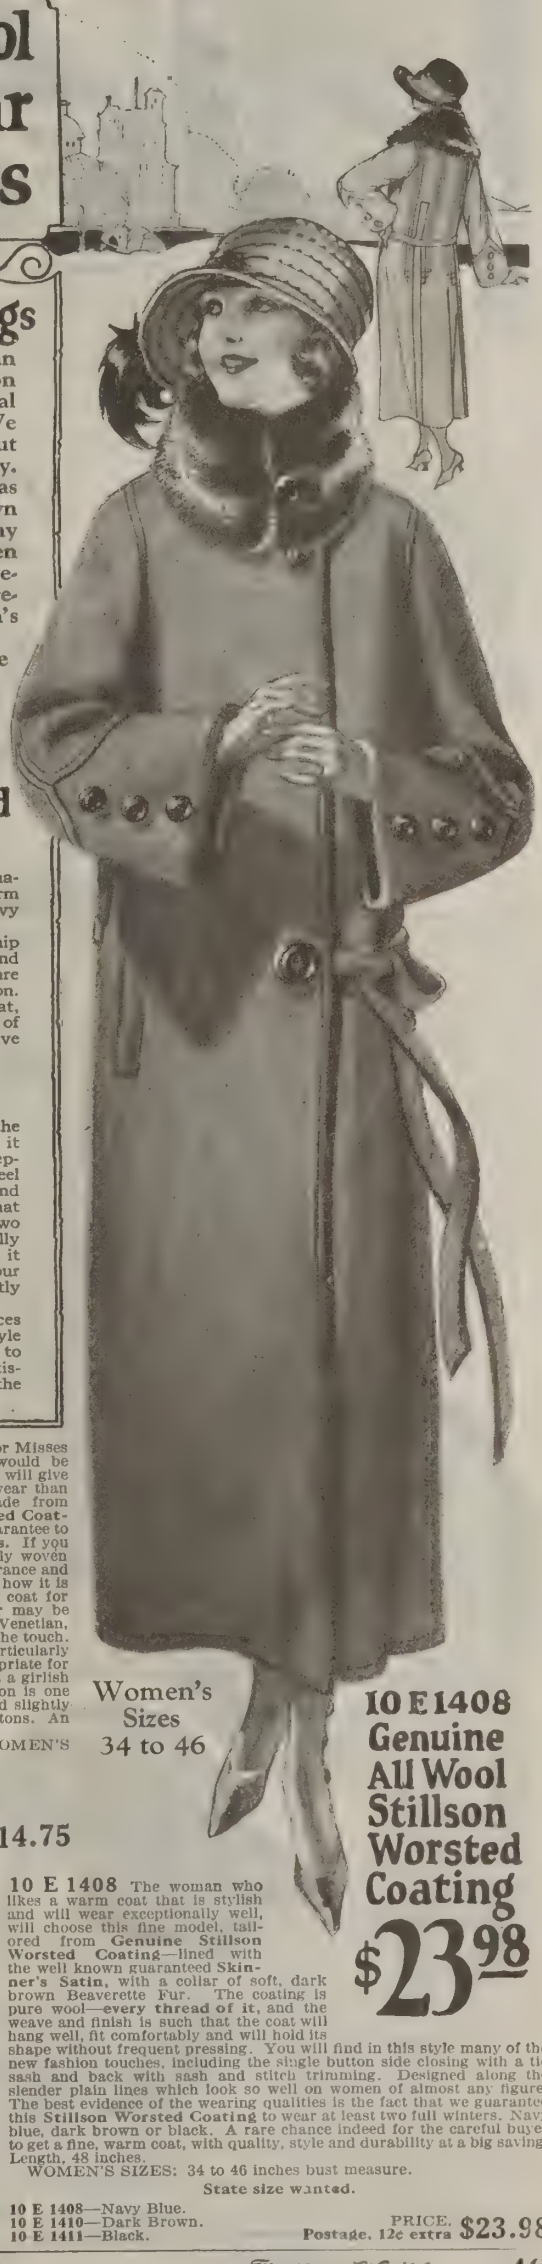
Genuine Stillson TRADE MARK Worsted Coats

100 Per Cent Pure Wool Guaranteed to Wear Two Full Winters



Ward's Savings are Your Savings

LAST fall we found a leading woolen mill with an overstock of 230,000 yards of genuine Stillson worsted coating and suiting. This fine material had to be turned into cash immediately. We bought the entire quantity for spot cash at about one-third of what the same grade would cost today.

Most of this high grade all wool material has been made into the men's guaranteed suits shown on Page 259 of this catalogue. We have sold many thousands of Stillson garments for men, and when mothers, wives and sisters saw how fine the material was—and observed its wearing qualities, we received many letters asking us to furnish women's coats made from this material.

So we have selected the heavier weights from the lot and are giving our women customers an opportunity to buy a 100 per cent pure wool, stylish, warm coat, guaranteed to wear two full winters, at less than the prices usually asked for coats made from greatly inferior material.

High Quality-Well Tailored Stylish-Long Wearing

Stillson Coating is one of the best wearing all wool materials it is possible to manufacture. Closely woven and firm in texture, it provides great warmth without being so heavy as to be cumbersome.

This fine material is combined with good workmanship and expert design in these fine coats for women, misses and girls. Every coat shows quiet, good taste, and the styles are not extreme, therefore, will be good for more than one season.

When a woman comes to the purchase of a winter coat, there must be more in its favor than the mere matter of price. The price must be right, but the coat must also have the proper style, fit and wearing qualities.

You Are the Judge

We want you to satisfy yourself that these are the greatest coat values you ever saw. Order one—try it on in your own home—examine carefully the exceptional quality of the material and workmanship—feel how warm and comfortable it is—notice the style and fit. Then consider our low price and the fact that **Stillson Worsted Coating** is guaranteed to wear two full winters. If you do not feel that this coat is actually worth several dollars more than our price—send it right back to Montgomery Ward & Co. and all of your money, including postage both ways, will be promptly refunded. No offer could possibly be fairer.

The women of taste, the woman who practices economy—the woman who appreciates correct style combined with extreme durability will not hesitate to order one of these coats—and she will be well satisfied, not only with the garment itself, but with the saving she makes in buying it at Ward's.

10 E 1400 For Junior Misses and Small Women. It would be difficult to find a coat that will give more warmth, style and wear than this excellent model, made from **Genuine Stillson Worsted Coating**, a material that we guarantee to wear for **two full winters.** If you could see one of these coats, feel the firmly woven all wool material, and notice the fine appearance and excellent workmanship, you would wonder how it is possible for Ward's to offer such a good coat for only $14.98. Collar of brown Coney Fur may be worn high or low. Lining is of striped Venetian, which wears well, looks well and is soft to the touch. How to Measure

Do not order Gloves too small. Get the correct size, and they will fit better and wear longer.

To find correct size, draw a tape measure around hand as shown in picture above, not tightly, and not including the thumb. To the number of inches shown, add ¼ inch for your correct glove size.

A Trim Figure With Greater Comfort

THE woven wire bone in the picture below is exactly like those in every corset shown on this page. Strong as a steel coil—when your body needs support it gets complete support if you wear one of these corsets. Flexible as a spring—when you bend the woven wire boning bends and the corset bends with the body. When you straighten up the corset again resumes its trim lines. Thousands of women have learned what it means to have "A Trim Figure with Greater Comfort." There is a corset on this page to improve every type of figure. Order the style designed to meet your figure requirements.

Ward's Twin-Fabric Underwear

Twin Fabric is the name of our newly processed, elastic ribbed underwear. This most comfortable underwear is knit so the inner side, which comes in contact with the skin is soft, smooth finished cotton which cannot scratch or be uncomfortable; and the outer surface, which protects you from winter cold and dampness, is of wool.

This single material with the two surfaces of wool and cotton lasts longer than a layer of cotton and a layer of wool sewed together—so it is economical as well as comfortable. Men who want solid comfort will find it in Twin Fabric Underwear. It gives and stretches with every movement of the body and yet retains its shape. It is everything good underwear should be plus added health protection that you'll never realize was possible until you have worn it.

Elastic Rib Retains Shape After Laundering

Heavy weight and warm—the kind of Union Suit men who are out of doors in cold weather appreciate.

One-third soft wool—gives warmth—the select cotton gives strength and helps also to prevent shrinking.

Knit in firm elastic rib which yields with every movement of the body. This is because these suits were made on spring needle machines which give a strong ribbed fabric that will always keep its elasticity and will retain its shape after laundering.

Note the reinforcements at the shoulders. They prevent sagging and insure a better fitting undergarment. The neck, another wearing point, has reinforced collarette band.

Wrists and ankles are finished with close fitting elastic ribbed cuffs—only found on quality underwear. Perfectly closed crotch. Roomy, wide lapped seat.

A union suit which fits perfectly yet does not bind at any point, and is a truly wonderful value at this price. When you examine it, you will wonder how Ward's can offer such good quality for so little money.

Ward's Twin-Fabric Underwear

WHEN a woman buys underwear she usually analyzes it from the standpoint of comfort, style and workmanship. Although style and workmanship always receive due consideration, the deciding factor, particularly in the case of Fall and Winter underwear, is comfort. After many months of careful thought, our labors have been generously rewarded by the development of a most remarkable underwear which we have named Ward's Twin-Fabric.

The construction of Ward's Twin-Fabric Underwear is decidedly unlike any other for the reason that it combines the weaving of separate wool and cotton threads into one material. The result is a garment with an outer surface of wool and an inner surface of cotton.

Many women desire the warmth that wool gives but object to wearing it next to the skin because of its tendency to scratch. On the other hand cotton underwear, whereas it may be comfortable, does not render the necessary warmth. Ward's Twin-Fabric Underwear with its outer surface of warm wool, insuring maximum protection from the cold and its inner surface of comfortable cotton gives you an ideal combination—a garment representing 100 per cent efficiency as to warmth and comfort. The illustration in the upper left-hand corner shows how the wool and cotton threads are woven into one fabric. Ward's Twin-Fabric Underwear comes in different qualities, as listed on this page.

What We Mean by a Pair of Blankets

A Pair of Blankets is in reality two blankets woven in one continuous length. For example, a pair 72 by 80 inches is one long blanket 72 by 160 inches, which when doubled makes what is called a pair. A pair of Blanket Sheets or Crib Blankets is two separate Blankets.

How To Wash Blankets

Dissolve two tablespoonfuls of Lux, Ivory Flakes, Ward's Helping Hand Flakes, or any other pure soap, chipped fine, in a gallon of boiling water. Whisk the soap flakes into a rich lather, then add cold water to make the suds lukewarm.

Put the blankets in and work them up and down, at the same time turning them, but do not rub, as rubbing is likely to make any blanket stiff and matted. Where there are soiled spots squeeze through the cleansing suds until the spots disappear.

Rinse in three clear waters of the same temperature. In the last rinsing water add a small quantity of soap flakes—not enough to make a lather. This makes them fluffy

Nashua Fine Blankets For Warmth and Comfort

Formerly Known as Nashua Woolnap Blankets

NASHUA fine cotton Blankets are far warmer than ordinary cotton blankets because, under the Nashua Process, they are made like wool blankets. Remember, the warmth is not in the wool or cotton—a blanket simply "holds in" the warmth of the body. Woolen blankets are warm because of the structure of the wool; the crinkly fibers form countless little air spaces, while ordinary cotton fibers usually lie flat and smooth. The Nashua Process practically gives to cotton the structure of wool.

Fine Quality All Wool Blankets

Ward's Feature Blanket Values

These Blankets are made from long staple wool—nothing else—thoroughly scoured and finely carded. There is not an ounce of "reworked" wool in them. They are carefully woven in popular block checked patterns of blue, tan, gray or pink combined with white. When properly laundered the colors will not fade and the blankets will not shrink. Edges are strongly stitched with mercerized thread to prevent raveling. Made full size to tuck in generously all around. Every blanket is wrapped in a separate container so you receive it fresh and clean, just as it came from the mill. Full instructions for laundering are printed below and are enclosed with each blanket, too.

The soft, fleecy wool, woven with a heavy nap assures warmth and comfort without extra weight. The weight ranges from 4½ to 7 pounds a pair, depending on the size. A pair means two blankets woven in one length. Therefore a pair 66 by 80 inches is really one long blanket 66 by 160 inches which, when doubled, makes what is called a pair.

COLORS: Pink, blue, tan, or gray plaid. As illustrated.

How to Wash Blankets

DISSOLVE two tablespoonsful of Lux, Ivory Flakes, Helping Hand Flakes, or any other pure soap, chipped fine, in a gallon of boiling water. Whisk the soap flakes into a rich lather, then add cold water to make the suds lukewarm.

Put the blankets in and work them up and down, at the same time turning them; but do not rub, as rubbing is likely to make any blanket, either cotton or woolen, stiff and matted. Where there are soiled spots, squeeze the cleansing suds through again and again until the spots disappear.

Rinse in three clear waters of the same temperature as that in which you have washed them. In the last rinsing water, add a small quantity of soap flakes, not enough to make a lather. This makes them soft and fluffy.

Three-Ply Sock Yarn

This Yarn was selected especially for knitting socks. It is three-ply, smooth and uniform in texture; medium twist. You always get full value at Ward's for your dollar, and never more so than in this wool. Medium gray mixed only. Usually two skeins are enough for a pair of socks, but by buying four, you get enough for two pairs of socks at a price slightly higher than usually would be asked for two skeins. You save money by buying from Ward's. Net weight per skein, 4 ounces.

Ideal for Sweaters and Scarfs

A soft, four-ply woolen Yarn easy to work with. It is good and heavy—the kind you want to put into a warm, comfortable sweater for outdoor use. Will give unusual service as each strand is strong, evenly woven and medium loosely twisted. Articles made with this yarn will retain their rich soft appearance, and smooth fit, because it is so elastic. Sport skirts, sweaters and hats are always in good taste and can be made up very easily in this yarn. Knitted garments make a smart addition to a woman's wardrobe. The colors are standard; however, it is always well to order enough wool at one time to complete a garment—then there will be absolute uniformity of color. If you have not done this, always enclose a sample of the wool you want matched. Net weight per skein, 4 ounces.

COLORS; Navy blue; cardinal; khaki; medium gray; black or white.

"Why I Bought 500,000 Pairs of Shoes in These 5 Styles

Prices Greatly Reduced Without Lowering Quality

"EARLY last February I visited two of the leading shoe factories in the East—factories known the world over for making high grade shoes for men and women.

"These factories were located right in the heart of the shoe making district, in a section where living expenses were not so high, and it was not necessary to pay excessive labor costs.

"It was during the 'slack season', when shoe factories were not running to full capacity—a very good time to buy the shoes for this big sale.

I met the factory owners and told them I wanted to buy well made shoes at very low prices and without reducing the quality in any way. I told them that to make this deal they would have to figure everything down to rock bottom. They agreed to co-operate with us in every way possible to make this the greatest shoe sale in Ward's 51 years of business history. And with this understanding, I placed an order for 500,000 pairs of shoes.

How the Costs Were Brought Down

"One of the manufacturers owned and operated one of the largest and finest leather tanneries in the world. He had in his warehouses thousands of hides that he had bought months before at prices fully 25% under their true value. We were assured of this large supply of high grade leather at a big saving. By using this and other fine leathers bought at a low price—by operating the factories to full capacity during the 'slack season'— thereby keeping men and machines busy, and by making such a large quantity of shoes of each style, the cost could be reduced to a very low figure without lowering quality in any way. Here was an opportunity to save hundreds of thousands of dollars for Ward's shoe customers.

"Inside of twenty-four hours I had closed the contract for 500,000 pairs of good shoes in the five different styles offered in this sale. Every pair is a remarkable value.

Our Savings Are Your Savings

"It is a rule at Ward's that all such savings must be passed along to our customers—and that is exactly what we are doing in this big shoe sale.

"If you ever bought any shoes from Ward's, you know that we never sacrifice quality just for the sake of making low prices. Every one of these shoes is made with high class workmanship, from solid leather—and Ward's solid leather means that leather, and leather only, is used for uppers, vamps and soles. No paper or leather composition is used in making these important parts. That is why Ward's shoes wear so well.

You Can Depend on Ward's Quality

"You may not know the difference between grain leather or split leather. You may not be able to tell the difference between oak tanned sole leather and the cheaper fiber. You can not be expected to detect these differences in materials. You don't have to be able to when you buy shoes from Ward's where high quality standards are always lived up to.

"There is one rule at Ward's that will stand as long as the house stands. When it comes to a question of a few cents more profit or a few cents more of good shoe value—the shoe always wins. We do not claim to be the only people selling good shoes; but we doubt if you can find anywhere in this country such good shoes as those shown on the next page, at prices so low."

We Never Have Offered Greater Shoe Bargains

It is not low prices that sell our shoes—because shoes can be made to sell at any price. It is quality, merit, and value that sell them—so we ask you not to judge the quality of these shoes by their low price. When you buy your shoes you are entitled to a certain amount of wear for the price you pay. It is our duty to see that you get it.

Quality Always Comes First

Shoes, like everything else Ward's sells, have to be right or we don't offer them to you. They must contain good materials, high class shoe making, good finish, correct shape and smart style. Quality in Ward's shoes is never a matter of chance. We know before we receive our shoes from the factories that the quality will be there, because we order them made that way. And we always make it a point to tell you exactly what kind of shoes to expect.

Why Ward's Shoes Wear

Ward's shoes are actually better in wear, fit and value simply because in buying as many as five hundred thousand pairs of shoes at one time, we are able to demand higher grade materials and better workmanship. We do not believe you can find better footwear in the country for the same low price as you pay in this sale. **We do not buy poor shoes from the factories, therefore we can not sell you poor shoes, no matter how little you pay for them.** No inferior shoes are to be found here at any price.

Big Savings

Our customers all know that when Ward's advertise special prices we mean exactly what we say—and in this sale we can assure you that these good substantial shoes are selling at prices away below their true value. There are five practical and stylish models from which you will be able to select the pairs that will surely suit you.

Special Work Shoe Bargain

Ward's Special Men's Work Shoe at $2.49 is a good example of the values offered in this sale. We pay more attention to the shape and fit of our work shoes than is usually given to shoes of this kind. We believe that men who are on their feet all day are entitled to all the comfort they can get —so this big, husky shoe is made over the well known Soft Toe Munson Last, one of the most comfortable ever designed. The leather used is specially selected to give the greatest wear, and this strong shoe will give you service out of all proportion to its low price.

"Hyde Park" Style for Men

For the man who likes a good stylish shoe, we recommend our **"Hyde Park"** model at $2.98, in either tan or black, with rubber heels. This shoe is made over a popular last, is comfortable and will wear exceptionally well. Made with the latest style features, including the French Toe and stylish perforations on toe and uppers.

"Glove Fit" Walking Oxford

We want our women customers to notice the late style and excellent quality that we offer in our **"Glove Fit"** model at only $2.98, including rubber heels. Surely you never expected to be able to buy such a good shoe at a price so low. This shoe will fit comfortably and look well. The wearing quality is sure to be satisfactory.

A Shoe Built for Comfort

Then there is that very popular and practical shoe for women with sensitive feet, or those who are on their feet much of the time—our **"Comfort Queen,"** with rubber heels, at only $1.98. This style shoe is worn by thousands of nurses and housewives all over the country, and if you could you would place the value at around $3.50. The **"Comfort Queen"** will wear well and always be comfortable. A bargain, as those who know shoe values will quickly appreciate.

Our New "Smart Style" Model

Women who want the latest style in a walking oxford made from specially selected leather, will choose our **"Smart Style"** model. This style is an exact reproduction of which is now selling in New York and Chicago for from $8 to $10 per pair. We have reproduced this shoe for you in genuine calfskin, in brown or black, with the new two-tone orange stitching on all seams. Has good rubber heels. Never before in our history have we offered a shoe with the same features as this one at a price so low as $3.29.

Make Your Saving Now

We want you to convince yourself that you do not have to pay fancy prices to get stylish, long wearing shoes—when you buy at Ward's. Order as many pairs as you like without any risk whatever. The more pairs you buy, the more money you save. Try these shoes on in your own home. Notice the fine workmanship, excellent leather, correct fit —and feel how well they fit and how comfortable. Show them to your friends, and then judge the true value.

Three Pairs for the Usual Cost of Two

After carefully examining these shoes, if you do not consider that they are worth at least one-third more than our low prices—if you do not decide these are the best shoes you ever saw for the money—send them right back to Montgomery Ward & Co. All of your money, including postage both ways, will be promptly refunded. No offer could possibly be fairer. And remember, this offer is backed by a house with a reputation for fifty-one years of Fair and Honest Dealing.

Our printed statement is our word of honor.

What Our Customers Say About Our Shoes

"I wish to thank you for your promptness. Will say that I am well pleased with my shoes. I do not hesitate to tell you that these shoes would have cost me $10 at our local shoe store. I saved at least one-third. Thank you again for your courtesy and promptness."
MRS. F. S. CREWS,
Winterhaven, Fla.

"Three years ago, when prices were high, I could not buy good shoes in the stores for less than $8 to $10. Looking through your catalogue I found a pair for only $4.39. I wore them fully a year and a half, and would be wearing them yet, but I gave them to a friend. The shoes were built for service. Made of fine leather, and they stood the weather—rain or shine."
E. E. SCHLAVIN,
Wrenshall, Minn.

"I am still wearing a pair of work shoes bought from you 10 months ago for $2.48. They are still in fairly good condition. They have already given me three times the service I formerly got from $7 shoes bought locally. Have been dealing with you for 20 years and never received faulty or inferior goods."
CHAS. W. McDOWELL,
Morgantown, W. Va.

"I am wearing a pair of shoes bought from Ward's in the spring of 1918. They have outworn three pairs of soles and one pair of heels. Haven't a hole in them and not a seam has ripped."
J. C. DORNBUSH,
Brookport, Ill.

What Goodyear Welt Means to You

THERE is no other method of fastening the sole to the upper which can compare with the Goodyear Welt for style, sturdiness and comfort. Do not confuse this method with "Goodyear stitched," a greatly inferior process, so named only to confuse you. "Goodyear stitched" soles have no leather welting.

At Ward's you get the Genuine Goodyear Welt.

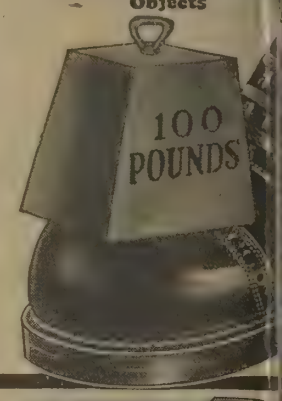
Hard Box Toe Protects Your Toes from Falling Objects



The Eight Big Reasons for Ward's Work Shoe Supremacy

1 The Vamp of this shoe is not cut off under the tip but extends forward, full size, to the sole.

2 Two thicknesses of Outsole through to the heel. Heavy oak bottomsoleandheavy chrome second sole.

3 The Insole is full grain smooth leather and is of quality used in making outsoles for many shoes.

4 Three rows of waxed thread Stitching reinforced with three copper rivets. Makes the uppers ripproof.

5 The Heels are solid leather and securely fastened with iron nails so they can not come off.

6 The Sole leather Counter keeps the shoe from running over. There is an inside counter pocket.

7 A heavy leather Pull Strap reinforced with four copper rivets and two rows of stitching.

8 Heavy, soft farmproof chrome retan leather Uppers. Will stand a great amount of hardest wear.

Shoe Terms Explained

Solid Leather
When we say a shoe is made of "solid leather" we mean that the outsole, insole, counter and uppers are genuine leather. These shoes will give the longest wear a leather shoe can give. Solid leather also assures permanent shapeliness, which means comfort to your feet during the entire life of the shoe.

Turned Sole
The "turned sole" process of fastening the sole to the upper is highly satisfactory in women's comfort shoes and slippers, women's dress comfort shoes and in children's shoes. The method is famous and popular because of the extreme flexibility it gives to the sole, which must be cut from choice quality leather.

Chrome Sole
In sole leather the full thickness of cattle hides is used. Chrome tanned sole is absolutely the strongest and lightest sole leather. The chrome tanning process makes leather very tough, and heavy. A chrome mineral substance used as a filler literally makes it "wear like iron."

Genuine Goodyear Welt
The Goodyear Welt process of attaching a sole to the upper is founded absolutely on the hand lasted, hand sewed and hand finished method. The Goodyear Welt process is universally recognized as being without a peer in all the qualities which make a good shoe desirable. The Goodyear Welt process makes the most durable and comfortable type of shoe, and one on which the outsole can readily be renewed. Do not confuse this with Goodyear stitched, as this is a cheap process and is quoted only to secure prestige from the Genuine Goodyear Welt process. Goodyear stitched is made without a welt and its use in descriptions is often misleading.

Insole
The quality of the insole has an important bearing on the length of wear a shoe will give. We never sacrifice the quality of an insole. We use the best of genuine leather, guaranteed, and cushion insoles. This is only another reason why Montgomery Ward & Co. shoes are famous for quality and value.

Patent Leather
We use only chrome patent leather in all our shoes described as "patent leather." Patent leather is made from genuine leather over which a patent finish is thoroughly rubbed into the fiber of the leather and dried in direct sunlight, which produces a firm, glossy coat.

Gunmetal
"Gunmetal" is a name which applies to a fine grade, well finished black leather. It is chrome tanned with a dull or semi-bright finish. Popularly used in men's, boys' and children's medium and better grade dress shoes, and also in women's walking shoes and oxfords. Gunmetal leather is famous for its softness and serviceability.

Stitchdown
This sole fastening process leaves the inside perfectly smooth. The edge of the upper is turned outward on the sole and stitched straight through. There are no nails, tacks nor threads inside of shoes made this way. Generally used in children's play and dress shoes and barefoot sandals.

Work Shirts

Big, Roomy, Well Fitting. A Man's Size Shirt for a Man's Size Job!

One of the best values in men's dependable Work Shirts that we are able to offer. A dependable shirt—a shirt that takes all the hard usage and hard labor you can give it, and wears like iron. The material is Khaki Jean, one of the strongest, sturdiest materials for work shirts.

Notice in the picture the way it is made. Could anything be stronger and more comfortable than the five-button coat style that slips on and off so easily and stays in place so comfortably; the double stitching throughout except on cuffs (double proof against rips, tears and strain); two big button-through pockets—the kind of pockets a man likes. Collar and cuffs both are lined to keep their shape. Neckband is the good fitting extension type and shirt has flat collar. Trimmed with ivory buttons.

And there's something else that you can't see in the picture,—the quality and service of this Khaki Jean shirt that you will remember long after the price is forgotten.

oth of these materials were extremely high de, and in such large quantities were hard to ose of quickly. Always on the lookout for h bargains for our customers, we obtained mples. After testing the materials in our own oratories for quality, and finding them of the hest grade, we made a spot cash offer for the ire 430,000 yards, and the material was ours price that would not pay the present cost of raw wool alone—a price just about one-third what the same material would cost if we ght it today.

To make the style permanent, the coat is full lined with durable twill cloth, the pockets stayed at the corners and stayed to the interlining to prevent them from sagging. Regular five-button vest; trousers with cuffs 1½ inches wide. All seams are strongly sewed and every detail carefully finished.

The fabric used in the suit illustrated above is plain color cheviot suiting. It makes up into a dressy, trim suit equally suitable for dress or business wear. A wise selection for your fall suit. It is in every way typical of the quality of the materials pictured to the right, which are made up in this model.

$10.00

This Big Overcoat Sale is the result of months of preparation. Thousands of these fine All Wool overcoats are now ready for shipment. At our extremely low price they will sell rapidly—and our supply is limited. Therefore, you should order your overcoat without delay.

AT the time the U. S. Military forces were reduced to a peace time basis, our Government had made contracts for great quantities of very fine overcoat material—Genuine All Virgin Wool Melton Cloth weighing 32 ounces to the yard.

The government bought this material for some of the finest army coats, but the coats were not made because they were not needed.

This fine overcoat material had to be sold at once, regardless of price. After testing the samples thoroughly we bought carloads of this 32-ounce Melton Cloth at a fraction of its original cost—the only reason in the world we are able to offer you such a fine coat as this for only $10.00.

Please understand that these are not the regulation U. S. Army style overcoats. They are made up as civilian coats, containing the same warm durable material as army coats; but we had this material tailored into a stylish up-to-date Overcoat suitable for dress or everyday wear. This kind of material is seldom found except in very expensive garments—but now we are offering you this good overcoat for less than the cost of making the cloth alone!

Every Man Will Want One of These Overcoats

Genuine 32-ounce U. S. Government Melton Cloth is one of the warmest and best wearing materials it is possible for money to buy. It is closely woven, extra heavy and will "wear like iron." The color is olive drab; and as you know, olive drab does not easily show dust and dirt. That is why it is so popular—and one reason why the government uses this color exclusively for soldiers' clothing.

You certainly should have one of these fine overcoats at this low price. The warmth, comfort and style will appeal to every man who drives an automobile in winter. It will appeal to every farmer, lumberman, stockman, truck driver, railroad man—in fact, any man whose work takes him out of doors in cold weather. Rough usage that would wear out an ordinary overcoat in a short time will have no effect on this **Genuine 32-ounce Melton** because this material was **made according to U. S. Government specifications**—and you know what that means!

Stylish—Well Tailored

For style, let the picture tell its own story. There it is—a big husky overcoat with roomy, heavy patch pockets, all around belt and a fine warm collar that you can turn up around your ears and defy the coldest winds. This big, warm overcoat is cut full and roomy to allow perfect freedom of movement; yet the style is such that it will fit perfectly and comfortably and will look well on men of almost any build.

The tailoring is one of the features of this overcoat, which was made in one of the best equipped overcoat factories in this country. Strongly sewed seams throughout to guard against ripping. The coat itself is so heavy and warm that the only lining necessary is in the yoke and sleeves, and that lining is made from **durable twill.** We have taken particular pains to sew the pockets so that they will be extra strong to stand the strain of daily wear.

You Are the Judge

We want you to convince yourself that you can get better bargains at Ward's than elsewhere. Order one of these fine overcoats. Examine the material and workmanship thoroughly. Try to tear it, and notice the tremendous strength. Try the coat on in your own home and see how comfortable and easy it feels. Then consider our low price—only $10.00.

If you are not perfectly satisfied with this bargain—if you do not consider that it has finer material than any overcoat you ever saw selling for at least $25.00, send the coat right back to us and we will refund all your money—including postage both ways. No offer could be fairer. And when you consider that this offer is made by a house with a reputation for fifty-one years of Fair Dealing, you will realize that you are taking no risk whatever in accepting this wonderful bargain offer.

We Will Not Accept Dealers' Orders

So that as many customers as possible may take advantage of this special overcoat bargain, we will not accept orders from dealers.

Read What An Expert Says About This Material

When we wanted an expert opinion about the quality of 32-ounce Government Melton, we did not go to the people who made the cloth, or people who sold it to us. We went to a man who is considered one of the greatest wool experts in this country. This is what he told us:

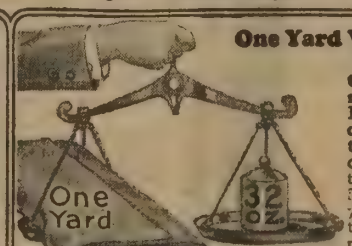
"The 32-ounce Melton which you are offering in your special overcoat bargain is one of the strongest, best wearing and warmest materials made. If you can do what you say—sell an overcoat made from this material for only $10.00, you are offering your customers an opportunity that comes only once in a lifetime. You are to be congratulated on securing this remarkable bargain."

Charles J. Webb,
Kent Woolen Mills

Thick and Heavy

Thirty-two ounce Melton is an extremely heavy, closely woven material that "wears like iron." Its tremendous strength guards against ripping and tearing. This illustration shows the actual thickness and texture of this material. The average thickness is more than one-sixteenth of an inch, or almost the thickness of a silver dollar.

A picture can not reveal the true quality of this fine material. You will have to see it to really appreciate its value.



One Yard Weighs 2 Pounds

When we tell you that this overcoat is made from 32-ounce Melton, we mean that one yard of the material weighs 32 ounces, or two pounds. We test all samples carefully for weight, but you are doubly sure of the weight of this material because it was made according to U. S. Government specifications—which means full weight.

100 Per Cent Pure Wool

When the chemists in Ward's big testing Laboratory want to know how much wool there is in any material, they simply dip a piece of it in a weak alkali solution. Alkali dissolves all the wool—and if the material contains any cotton or shoddy whatever, this test is sure to show it.

When this 32-ounce Melton was submitted to this test, every bit of the material was dissolved. This proves beyond a doubt that the material is 100 per cent Pure Wool. It contains not one thread of cotton.
